

TM Watch ☒ how your free 30-day watch works

Thank you for starting a free 30-day watch on one mark. No card, no account, no renewal.

1. At checkout you entered the exact text of your mark. That is all we need ☒ no account to create.
2. Within one refresh cycle (at most 24 hours) your own private alert page goes live. Open apventureengine.github.io/trademark-watch/alerts/, type your mark and the email address you used at checkout, and it opens your page. Bookmark it, or subscribe to its RSS feed (link at the top of the page) if you would rather be pushed than pull. Optional: if you gave a GitHub username at checkout you also get invited to a private repo with the same alerts as files.
3. Every Tuesday the USPTO publishes the Trademark Official Gazette: ~10,000 applications published for opposition plus all registrations issued. The same day we match every word mark in it against yours (edit distance + phonetic code + common variants) and write any hits to `alerts/<your-username>/<date>.md` in the repo. No hits = no file, no noise.
4. A mark published for opposition can be opposed, or an extension of time requested, for 30 days from its Gazette date. Each alert row links to the mark's live USPTO TSDR status page.
5. Your free watch stops after 30 days; your alert page then shows an 'expired' banner and a link to keep watching for \$29 / mark / year (one-time, 12 months, no auto-renewal).
Nothing is ever charged automatically.

Sample alert (real: watched mark STELLANITE vs the 2026-09-01 issue)

Serial	Mark	Gazette date	Event	Cls	Why flagged
50001495	STELLANITE	2026-09-01	Published for opposition	11	identical, phonetic-equal STLNT
50001643	STEELANITE	2026-09-01	Published for opposition	11	edit sim 0.90, phonetic-equal
98152938	STELLA ARTE	2026-07-21	Registered	3	edit sim 0.80, phonetic-near

Not legal advice. A flag means 'a human should look', never an opinion on likelihood of confusion.

Design-only marks (logos without words) are out of scope; the matcher is text-only.

Refunds: full refund within 14 days of purchase, via Gumroad. Contact: reply to your Gumroad receipt or open an issue at github.com/APVentureEngine/trademark-watch/issues ☒ both reach the operator.
